2026

PAPER – III

General Forestry
(English Version)

Question Booklet Sl. No.

1161321

Time : 150 Minutes

Max. Marks : 150

INSTRUCTIONS

1. The Question Paper contains 150 questions. Each question carries 1 mark. For each wrong answer 1/3rd mark will be deducted.
2. Please check the Question Paper and ensure that it contains all the questions. If you find any defect in the Question Paper or OMR Answer Sheet, please get it replaced immediately. The OMR Answer Sheet is in Duplicate. Do not separate the Copies. The markings on the first page will automatically come on the second copy also. The first copy (Original) will be retained for evaluation and the second copy (Duplicate) can be taken by the candidate.
3. Write your Registered Number on the top of the Question Paper. On the right hand corner of the first page, the Question Paper Series is printed as (A) or (B) or (C) or (D). On the OMR Answer Sheet, Side-1 at the right top corner at Part C, the Question Paper Series are printed as (A) (B) (C) (D). Darken the appropriate circle, as per your Question Paper Series with Blue/Black Ball point pen. Gel Pens/Pencils are not allowed.

Example to fill up the Question Paper Series on the OMR Answer Sheet.

If your Question Paper Series is A, please fill as shown below :

If you have not marked the Question Paper Series on the OMR Answer Sheet, Side-1 at Part C with Blue/Black Ball point pen, or marked in a way that it leads to discrepancy in determining the exact Question Paper Series, then your Answer Sheet will be invalidated without any further notice. No correspondence will be entertained in the matter.

4. Please get the signature of the Invigilator affixed in the space provided at the top of the OMR Answer Sheet. The OMR Answer Sheet without the signature of the Invigilator will be invalidated.

5. Each question is followed by 4 answer choices. Of these, you have to carefully select one correct answer and mark it on the OMR Answer Sheet by completely darkening the appropriate circle for the question. If more than one circle is darkened, the answer will not be valued at all. Use Blue or Black Ball point pen to make thick mark to fill the circle completely. Make **no** other stains or marks. Using **Whitener/Blade/Eraser/Chalk Powder** anywhere on the OMR Answer Sheet or any kind of tampering to change the answers on OMR Answer Sheet will lead to **invalidation** of the entire OMR Answer Sheet.

e.g. : If the answer for Question No. 1 is Answer choice (2), it should be marked as follows :

1	①	●	③	④
---	---	---	---	---

6. Do **not** fold, tear, wrinkle, tie, staple, do any rough work or make any stray marks on the OMR Answer Sheet. Otherwise your OMR Answer Sheet will be **invalidated**.
7. Do **not** mark answer choices on the Question Paper. Violation of this will be viewed seriously.
8. Rough work may be done on the last page of the Question Paper only. It should not be done anywhere else.
9. Any type of Electronic Devices such as Calculators, Mathematical/Log Tables, Mobile Phones, Bluetooth instruments, Digital Watches etc., should not be brought into the Examination Hall. If found in possession of such devices, it will be considered as cheating and strict action taken.
10. As per G.O. Ms. No. 385, GA (Ser.A) Dept., dt: 18/10/2016, if any candidate attempts to use any means to cheat/copy etc., he/she is liable for prosecution (Police Case) and debarment.
11. Candidates should stay in the Examination Hall till expiry of Full Time i.e. 2½ Hours. No candidate shall be allowed to leave the Hall in the middle of the examination under any circumstances.
12. Before leaving the examination hall, the candidate should hand over the OMR Answer Sheet top sheet (Original) to the Invigilator and carry the bottom sheet (Duplicate) for his/her record. Carrying away Original OMR Answer Sheet will be a criminal offence.

1. Which of the following is not a characteristic of Angiosperm Plant Cells ?

- (1) Cell wall
- (2) Chloroplasts
- (3) Centrioles
- (4) Large central vacuole

2. Deficiency symptoms of an element tend to appear first in young leaves. It indicates that the element is relatively immobile. Which one of the following elemental deficiencies would show such symptoms ?

- (1) Sulphur
- (2) Magnesium
- (3) Nitrogen
- (4) Potassium

3. The final electron acceptor in the electron transport chain of respiration is

- (1) NAD^+
- (2) FAD
- (3) Oxygen
- (4) Carbon dioxide

4. The function of mRNA is to

- (1) Carry amino acids
- (2) Transcribe genetic information
- (3) Translate genetic code into proteins
- (4) Store genetic information

5. Double fertilization in angiosperms involves

- (1) Two sperm nuclei fusing with the egg and polar nuclei
- (2) Fusion of two eggs with one sperm
- (3) Fusion of pollen tube with ovule
- (4) Formation of two zygotes

6. The best time to collect seeds is when they are

- (1) Immature
- (2) Fully mature but not dispersed
- (3) Rotten
- (4) Infested with pests

7. Which condition favors fungal growth ?

- (1) Dry and hot weather
- (2) Cold and dry weather
- (3) Warm and humid weather
- (4) Windy conditions

8. RNA interference (RNAi) is used in transgenic plants to
- (1) Increase photosynthesis
 - (2) Silence specific pathogen genes
 - (3) Enhance nitrogen fixation
 - (4) Accelerate flowering
9. The vegetation in the Rayalaseema region is primarily
- (1) Thorn scrub
 - (2) Evergreen forest
 - (3) Grasslands
 - (4) Wetlands
10. Wasteland reclamation involves
- (1) Converting forests into urban areas
 - (2) Restoring degraded lands for productive use
 - (3) Mining minerals from barren lands
 - (4) Increasing industrial pollution
11. Which branch of horticulture deals with fruit crops ?
- (1) Olericulture
 - (2) Pomology
 - (3) Floriculture
 - (4) Arboriculture
12. Plant hormone Indole-3-Butyric Acid (IBA) is used to
- (1) Prevent diseases
 - (2) Enhance root initiation
 - (3) Reduce transpiration
 - (4) Increase flowering
13. Which plant is commonly propagated by mound layering ?
- (1) Rose
 - (2) Apple rootstocks
 - (3) Banana
 - (4) Pineapple
14. Which is a common rootstock for apple grafting ?
- (1) M9 dwarfing
 - (2) Juglans regia
 - (3) Oryza sativa
 - (4) Zea mays
15. Hydroponics is often integrated with greenhouses to grow plants
- (1) In soil-less media
 - (2) Under shade nets
 - (3) In open fields
 - (4) Without water
16. Which of the following is not a distinguishing feature of plant cells ?
- (1) Cell wall made of cellulose
 - (2) Presence of chloroplasts
 - (3) Lysosomes absent
 - (4) Presence of centrioles

17. Yellowing of older leaves while young leaves remain green indicates deficiency of

- (1) Nitrogen (2) Iron (3) Calcium (4) Boron

18. In C_4 plants, CO_2 fixation initially occurs in

- (1) Mesophyll cells (via PEP carboxylase) (2) Bundle sheath cells
(3) Stroma (4) Cytoplasm

19. The semiconservative model of DNA replication implies

- (1) Both strands are newly synthesized
(2) Each daughter DNA has one old and one new strand
(3) Only the leading strand replicates
(4) DNA replicates only in cytoplasm

20. Wind pollinating (anemophilous) plants typically exhibit

- (1) Sticky pollen
(2) Small, inconspicuous flowers
(3) Large, brightly colored petals
(4) Heavy nectar production

21. Seed dormancy caused by a hard seed coat is best overcome by

- (1) Cold stratification (2) Scarification
(3) Hormonal inhibition (4) Water stress

22. A common technique for collecting seeds from tall forest trees is

- (1) Drilling (2) Climbing and pole-pruning
(3) Budding (4) Micropropagation

23. Pathogens that can survive without a host are called

- (1) Biotrophs (2) Necrotrophs
(3) Facultative saprophytes (4) Obligate parasites

24. The predominant forest type in Andhra Pradesh is

- (1) Tropical wet evergreen
- (2) Tropical dry deciduous
- (3) Montane forests
- (4) Mangrove

25. Propagation through tissue culture belongs to

- (1) Sexual propagation
- (2) Macropropagation
- (3) Micropropagation
- (4) Hybrid propagation

26. Which sector shows the strongest link between horticultural development and foreign exchange earnings ?

- (1) Export of cereals
- (2) Export of fresh and processed fruits, vegetables and flowers
- (3) Export of pulses
- (4) Export of livestock

27. The success of root regeneration in cuttings is most strongly influenced by which physiological factor ?

- (1) High carbohydrate reserves and hormonal balance
- (2) Seed viability
- (3) Leaf venation pattern
- (4) Flowering stage of the mother plant

28. Which environmental factor most strongly influences successful rooting in layerage ?

- (1) Very low soil moisture
- (2) High humidity around the rooting zone
- (3) High wind speed
- (4) Short day length only

29. A critical requirement for successful grafting is

- (1) Alignment of cortical tissues
- (2) Proper alignment of cambial layers of scion and stock
- (3) Removal of all buds from scion
- (4) Use of genetically unrelated species

30. Rootstock selection is important because it influences

- (1) Only fruit color
- (2) Tree vigor, stress tolerance, disease resistance and yield
- (3) Only flower size
- (4) Only plant height without other effects

31. What is the role of producers in an ecosystem ?

- (1) Decompose dead material
- (2) Hunt herbivores
- (3) Create organic matter using sunlight
- (4) Feed on other organisms

32. What is the role of decomposers ?

- (1) Trap solar energy
- (2) Eat other animals
- (3) Break down dead matter and recycle nutrients
- (4) Produce seeds

33. How many biogeographical zones are in India based on vegetation and geography ?

- (1) 5 climate zones
- (2) 10 zones based on vegetation and geography
- (3) 15 river systems
- (4) 12 zones based on vegetation and geography

34. What is India's rank in the Global Nature Conservation Index 2024 ?

- (1) 1st
- (2) 176th
- (3) 76th
- (4) 180th

35. Which of the following is an endangered species in India ?

- (1) House sparrow
- (2) Bengal tiger
- (3) Cow
- (4) Domestic cat

36. How does afforestation help in climate change mitigation ?

- (1) Produces more wood
- (2) Destroys pests
- (3) Absorbs CO through photosynthesis
- (4) Causes flooding

37. Which is the first gazetted biosphere reserve in Andhra Pradesh, known for its endemic species and Eastern Ghats ecosystem ?

- (1) Coringa Wildlife Sanctuary (2) Seshachalam Biosphere Reserve
(3) Pulicat Bird Sanctuary (4) Papikonda National Park

38. Naupada Coastal and Marine Biodiversity Area (ICMBA) is located in which district of Andhra Pradesh ?

- (1) Vizianagaram (2) Visakhapatnam
(3) Srikakulam (4) Alluri Sitharama Raju

39. Which protected area is known for conserving a subspecies of the Indian swamp deer (Barasingha), adapted to hard ground and exclusively graminivorous ?

- (1) Kanha National Park (2) Manas National Park
(3) Mudumalai Wildlife Sanctuary (4) Tal Chhapar Wildlife Sanctuary

40. In which year was the Biological Diversity Act enacted in India ?

- (1) 2000 (2) 2002
(3) 2010 (4) 2017

41. The hardness of water is primarily due to the presence of which ions ?

- (1) Sodium and chloride (2) Calcium and magnesium
(3) Strontium and potassium (4) Potassium and nitrate

42. Under which Section of the Water (Prevention and Control of Pollution) Act, 1974 can a State Pollution Control Board serve directions to industries or persons for preventing or controlling water pollution ?

- (1) Section 30 (2) Section 20
(3) Section 33 (4) Section 21

43. Water with less than 1000 mg/l of Total Dissolved Solids (TDS) is classified as

- (1) Brine water (2) Fresh water
(3) Slightly saline (4) Moderately saline

44. What is the live storage capacity (approx.) of the Pulichintala Reservoir ?

- (1) 20 Tmcft (2) 36 Tmcft
(3) 46 Tmcft (4) 80 Tmcft

45. Check dams, contour bunding and percolation tanks are associated with

- (1) Air pollution control
(2) Groundwater depletion
(3) Watershed development and water harvesting
(4) Industrial effluent treatment

46. Which tree species is commonly recommended in watershed afforestation due to its fast growth and soil-binding roots ?

- (1) Acacia nilotica (2) Eucalyptus globulus
(3) Pinus roxburghii (4) Tectona grandis

47. The Integrated Watershed Management Programme (IWMP) is implemented under which Ministry ?

- (1) Ministry of Jal Shakti
(2) Ministry of Rural Development
(3) Ministry of Environment, Forest and Climate Change
(4) Ministry of Agriculture

48. Which law mandates that every state shall constitute a Water Resources Regulatory Authority ?

- (1) Environmental Protection Act, 1986
(2) National Water Policy, 2012
(3) State-specific Water Resources Acts
(4) Biological Diversity Act, 2002

49. The Andhra Pradesh, Water Land and Trees Act (WALTA) was enacted in which year ?

- (1) 1998 (2) 2002 (3) 2005 (4) 2010

50. Which gas is a major contributor to air pollution from vehicles ?

- (1) Oxygen (2) Nitrogen (3) Carbon monoxide (4) Helium

51. Which pollutant is most associated with acid rain ?

- (1) Methane (2) Sulphur dioxide
(3) Carbon dioxide (4) Ozone

52. The National, Air Quality Index (AQI) was launched in

- (1) 2012 (2) 2013 (3) 2014 (4) 2015

53. In an ecosystem, if decomposers are removed, which of the following processes would be most directly affected first ?

- (1) Photosynthesis (2) Nutrient cycling
(3) Food web stability (4) Predator prey balance

54. Which of the following best explains the functional role of producers in an ecosystem ?

- (1) They recycle minerals into the soil
(2) They feed on dead organic matter
(3) They regulate predator population
(4) They convert solar energy into chemical energy

55. If climate change alters the rainfall pattern of a region, leading to replacement of moist deciduous forests by scrublands, what type of diversity is primarily impacted ?

- (1) Genetic diversity (2) Species diversity
(3) Ecosystem diversity (4) Population diversity

56. A region is declared a biodiversity hotspot primarily based on which of the following criteria ?

- (1) High forest cover and large area
(2) Presence of endemic species and high threat of habitat loss
(3) High rainfall and dense vegetation
(4) Presence of many exotic species

57. If a species found only in the Eastern Himalayas is classified as Vulnerable by the IUCN, and climate change reduces its habitat range, what could be its next likely status ?

(1) Least Concern

(2) Near Threatened

(3) Endangered

(4) Data Deficient

58. Which forest protection strategy helps in community participation for conserving local forests ?

(1) Joint Forest Management (JFM)

(2) Monoculture Plantations

(3) Mining in Forest Regions

(4) Wildlife Tourism Expansion

59. Which type of impurity in water is biologically significant because it directly influences oxygen demand and microbial growth ?

(1) Carbonate minerals

(2) Dissolved organic matter

(3) Iron and manganese

(4) Suspended silica

60. Which of the following water-borne diseases is caused by a protozoan parasite rather than bacteria or virus ?

(1) Cholera

(2) Hepatitis A

(3) Amoebic dysentery

(4) Typhoid

61. Which physical parameter of water most directly indicates suspended impurities and affects light penetration in lakes and reservoirs ?

(1) Colour

(2) Turbidity

(3) Odour

(4) Temperature

62. Which of the following best explains how forests reduce flood intensity in watershed areas ?

(1) They absorb rainfall and slow down runoff through dense vegetation and root networks

(2) They divert river channels artificially

(3) They store all rainwater permanently in the canopy

(4) They increase surface erosion, reducing storage capacity

63. Chronic exposure to low-frequency industrial noise primarily affects which human system ?

(1) Digestive system

(2) Skeletal system

(3) Nervous and cardiovascular system

(4) Endocrine system

64. A river basin project diverts water for intensive irrigation upstream, leaving downstream villages dry. Which principle of sustainable water ethics is violated ?

- (1) Maximization of yield for immediate gain
- (2) Privatization of resource rights
- (3) Equitable distribution and inter-regional justice
- (4) Precautionary principle

65. Which rocks are formed due to the deposition and compaction of the remains of plants ?

- (1) Calcareous rocks
- (2) Carbonaceous rocks
- (3) Siliceous rocks
- (4) Siltstone rocks

66. Rift valleys are formed due to

- (1) Faults
- (2) Folds
- (3) Joints
- (4) Foliations

67. What is the another name of 'Black Soils' ?

- (1) Podzol
- (2) Latosol
- (3) Chernozem
- (4) Azonal

68. Which soil grown in humid areas under rich vegetation cover ?

- (1) Pedocols
- (2) Chestnut soil
- (3) Latosol
- (4) Pedalfars

69. Which of the following are reclamation methods of alkaline and saline soils ?

- (1) Improved irrigation and soil drainage
- (2) Decreasing water and wet
- (3) Cultivation of crops and ploughing
- (4) Keeping under fallow conditions and storing rain water

70. In which areas afforestation is important soil conservation method ?

- (1) Glacial areas
- (2) Semi arid and low rainfall receiving areas
- (3) Very high rainfall receiving areas
- (4) Cropped areas

71. The village level forest protection committees also called as

- (1) Wildlife Conservation Committees
- (2) Water Conservation Committees
- (3) Land Conservation Committees
- (4) Vana Samrakshana Samithies

72. In Remote Sensing Hyper Spectral Sensors are useful for

- (1) To discriminate one vegetation type to the another
- (2) To discriminate one plant to the another
- (3) To extract vegetation non biophysical information
- (4) To extract vegetation physical information

73. Which of the following instrument is used to measure angle of slope normally used in determination of height of trees ?

- (1) Hypsometer
- (2) Altimeter
- (3) Climometer
- (4) Girting tape

74. 'Form Factor' of trees is useful for

- (1) To estimate volume of standing trees
- (2) To measure the height of trees
- (3) To estimate volume of felled trees
- (4) To measure the diameter of trees

75. As per the National Working Plan Code – 2023, who shall head a Forest Working Plan ?

- (1) Forester
- (2) Conservator of Forests
- (3) Forest Guard
- (4) Deputy Conservator of Forests

76. Who are the important stakeholder in the forest enterprise and management ?

- (1) Wood Based Industries
- (2) Vana Samrakshana Samithies
- (3) Cultural Values Promoters
- (4) Forest Labour

77. Which of the following is an example of an igneous rock ?
(1) Lime stone (2) Basalt (3) Shale (4) Gypsum
78. A break or fracture in the Earth's Crust is called
(1) Fold (2) Joint (3) Fault (4) Lineation
79. Excessive use of chemical fertilizers leads to
(1) Soil fertility improvement (2) Increased biodiversity
(3) Soil degradation (4) Alkalization only
80. Which instrument is commonly used to measure the Diameter at Breast Height (DBH) of a tree ?
(1) Abney level (2) Haga Altimeter (3) Calipers (4) Increment Borer
81. Remote sensing is the science of obtaining information about an object without
(1) Measuring it (2) Contacting it physically
(3) Using satellites (4) Seeing it
82. Temporal resolution refers to
(1) Number of spectral bands (2) Size of pixels
(3) Frequency of image capture (4) Band width of sensors
83. Wireless communication in forests is most essential for
(1) Tree plantation (2) Forest road construction
(3) Fire alerts and poaching control (4) GIS digitilization
84. The Forest Management Information System (FMIS) integrates
(1) Physical and human data (2) Policy and legal acts
(3) Forestry data for planning and evaluation (4) Revenue and budgeting only
85. Carbon stock assessment is part of
(1) Legal forest protection (2) Climate impact evaluation
(3) Timber pricing (4) Forest road design

86. Which forest product is used in pharmaceutical and cosmetic industries ?

- (1) Sal wood (2) Gum and resins (3) Sandal wood logs (4) Mahogany timber

87. Systematic sampling involves selecting samples

- (1) At equal intervals (2) Randomly from clusters
(3) By judgement (4) Based on soil type

88. Which of the following is a main assumption for using regression estimation ?

- (1) No relationship exists between variables
(2) Variables are non-quantitative
(3) There is a linear and predictable relationship
(4) Only nominal data is used

89. The branch of forestry that deals with theory and practice of raising forest crops is

- (1) Forest utilization (2) Agroforestry
(3) Silviculture (4) Forest protection

90. In the natural regeneration process seeds of red sanders is normally dispersed through

- (1) Water (2) Wind (3) Birds (4) Gravity

91. The following tree is propagated through rhizomes

- (1) Bamboo (2) Teak (3) Eucalyptus (4) Terminalia

92. Forest water contains the following chemical in highest concentration

- (1) MgO (2) CaO (3) K₂O (4) Fe₂O

93. Cutting back of grown up trees to the ground level is known as

- (1) Tending (2) Singling (3) Coppicing (4) Brashing

94. Tree species successfully grown on large scale in coastal sandy soils are

- (1) Casuarina (2) Acacia (3) Eucalyptus (4) Azardirachta

95. Forestry aimed at producing flow of protection and recreation benefits to the community

(1) Agro forestry

(2) Urban forestry

(3) Social forestry

(4) Environmental forestry

96. The word Social Forestry was first pronounced by

(1) Swaminathan

(2) Jadhav Payeng

(3) Westoby

(4) Brandis

97. According to the National Forest Policy forest area in comparison to the total geographical area should be

(1) $1/3^{\text{rd}}$

(2) $1/5^{\text{th}}$

(3) $1/4^{\text{th}}$

(4) $1/6^{\text{th}}$

98. Certain aspects of theory and practice of raising forest crops, methods of raising tree crops, their growth and after care up to the time of final harvesting is referred as

(1) Forest Mensuration

(2) Forest Management

(3) Forest Utilization

(4) Silviculture

99. Which industry consumes a major proportion of bamboo ?

(1) Dye and tanning industry

(2) Paper manufacturing industry

(3) Oil and bio diesel industry

(4) Traditional medicine

100. Which of the following is not a type of social forestry ?

(1) Farm forestry

(2) Community forestry

(3) Urban forestry

(4) Industrial forestry

101. Which of the following correctly describes the uses of Santalum album ?

(1) Mainly valued for its latex and gum used in adhesives

(2) Known for fragrant heartwood and oil used in perfumery, cosmetics, medicines and religious rituals

(3) Cultivated primarily as a fodder tree for livestock

(4) Used only as a fuelwood species with no commercial significance

102. Which training institution is responsible for imparting foundational training to IFS probationers ?

- (1) Forest Research Institute (FRI), Dehradun
- (2) Indian Institute of Forest Management (IIFM), Bhopal
- (3) Indira Gandhi National Forest Academy (IGNFA), Dehradun
- (4) Wildlife Institute of India (WII), Dehradun

103. Grass is rich in

- (1) Proteins
- (2) Starch
- (3) Cellulose
- (4) Amino acids

104. Deficiency of which Vitamin causes anaemia ?

- (1) Vitamin E
- (2) Vitamin D
- (3) Vitamin B3
- (4) Vitamin B12

105. Biological vector of bluetongue virus

- (1) Mosquito
- (2) Ticks
- (3) Flea
- (4) Culicoides

106. Which test is used to identify the mastitis disease in cattle ?

- (1) Widal test
- (2) Tetrazolium test
- (3) Strep cup test
- (4) None of the above

107. How can you identify a python based on the nature of its ventrals ?

- (1) Broad ventrals not extending across the belly
- (2) Broad ventrals extending across the belly
- (3) Small and narrow ventrals
- (4) Presence of loreal pit

108. A well-known autosomal abnormality at birth is

- (1) Klinefelter's syndrome
- (2) Down's syndrome
- (3) Patau's syndrome
- (4) Turner's syndrome

109. The first technique that was adopted for forensic DNA analysis was

- (1) RFLP
- (2) PCR
- (3) HLA DQAI
- (4) STR

110. Which nutrient provides the highest energy content to animals ?

- (1) Carbohydrates (2) Proteins (3) Fats (4) Fiber

111. Which method is commonly used to preserve green fodder for off season feeding ?

- (1) Composting (2) Fermentation
(3) Silage making (4) Drip irrigation

112. Which of the following is a feed supplement ?

- (1) Terramycin (2) Vitablend (3) Zinc bacitracin (4) Flavomycin

113. Which contagious disease causes chronic infection of the small intestine in cattle, sheep and goats ?

- (1) Johne's disease (2) Anthrax (3) Black quarter (4) Rabies

114. Which insect acts as an important biological control agent by preying on pest insects ?

- (1) Braconid wasps (2) Termites (3) Leaf hoppers (4) White flies

115. What type of DNA commonly used in forensic identification ?

- (1) Nuclear DNA
(2) Mitochondrial DNA
(3) Both Nuclear DNA and Mitochondrial DNA
(4) Only RNA

116. Which of the following best defines regenerate ?

- (1) To rotate crops in different plots
(2) To introduce exotic species into a region
(3) To renew a forest crop by natural or artificial means
(4) To remove old trees from the forest

117. Which term describes a species that is not native to a specific area ?

- (1) Indigenous (2) Exotic (3) Coppice (4) Rotation

118. Which branch of forestry deals with the establishment, development, care and reproduction of forest crops especially timber ?

- (1) Dendrology (2) Agroforestry
(3) Silviculture (4) Forest mensuration

119. Which of the following species is most suitable for shelterbelt plantation in coastal areas ?

- (1) Mango (2) Teak (3) Rosewood (4) Casuarina

120. India's diverse climatic conditions result in which of the following ?

- (1) A uniform type of forest throughout the country
(2) Limited vegetation and forest types
(3) A wide range of forest types and plant species
(4) Only evergreen forests

121. Which of the following is not considered a topographic factor ?

- (1) Rainfall (2) Slope (3) Aspect (4) Altitude

122. Red Sanders is endemic to which region of India and has high demand in the international market ?

- (1) Western Ghats (2) Southern Part of Eastern Ghats
(3) Himalayas (4) Aravalli Hills

123. Arabica gum is extracted from which species and is mainly used for ?

- (1) Azadirachta indica (2) Santalum album
(3) Tectona grandis (4) Acacia nilotica

124. Kath (Catechu) is prepared from which tree species ?

- (1) Acacia nilotica (Babul)
(2) Acacia chundra (Khair)
(3) Azadirachta indica (Neem)
(4) Ficus religiosa (Peepal)

125. In Forest Mensuration Breast Height (BH) in India is taken as

- (1) 1.30 m (4 ft 3 in.) above ground level
- (2) 1.50 m (5 ft) above ground level
- (3) 1.20 m (4 ft) above ground level
- (4) 1.37 m (4 ft 6 in.) above ground level

126. Which of the following instruments is not commonly used for measuring the diameter or girth of a tree ?

- (1) Bark Gauge
- (2) Wooden Scale
- (3) Callipers
- (4) Measuring Tape

127. Surveying can be regarded as the art and science of

- (1) Map making
- (2) Wood measurement
- (3) Soil analysis
- (4) Forest inventory

128. How many links are present in a 20 m long metric chain ?

- (1) 50
- (2) 200
- (3) 100
- (4) 20

129. Which of the following is the basic definition of a brick ?

- (1) A natural stone block used for building
- (2) An artificial block of burnt clay used for building purposes
- (3) A cement block used in construction
- (4) A sun-dried block made of sand and lime

130. The portion of the road used by vehicles is called

- (1) Berm
- (2) Sub-base
- (3) Carriage way
- (4) Wearing course

131. The need for public awareness of environmental science arises mainly due to

- (1) Reduced scientific research
- (2) Rapid industrialization and population growth
- (3) Excess agricultural production
- (4) Limitation of environmental policies

132. Which of the following is an effect of long-term exposure to noise pollution ?

- (1) Reduced blood pressure
- (2) Improved sleep quality
- (3) Noise-induced hearing loss due to inner ear damage
- (4) Strengthened nervous system

133. Which of the following is a major source of thermal pollution ?

- (1) Paper recycling units
- (2) Coal-fired power plants
- (3) Wind energy plants
- (4) Solar power panels

134. Composting is a solid waste management method mainly useful for

- (1) Non-biodegradable waste
- (2) Biodegradable organic waste
- (3) Metallic waste
- (4) Nuclear waste

135. What is the main purpose of Environmental Impact Assessment (EIA) ?

- (1) To increase industrial output
- (2) To predict environmental consequences of proposed projects
- (3) To promote deforestation
- (4) To assess economic returns only

136. Which process is responsible for trapping heat in the earth's atmosphere leading to global warming ?

- (1) Ozone formation
- (2) Acid rain
- (3) Greenhouse effect
- (4) Photosynthesis

137. Sri Lankamalleswara Wildlife Sanctuary is habitat for which of the critically endangered species ?

- (1) Great Indian Bustard
- (2) Jerdon's Courser
- (3) Blue Jay
- (4) Peafowl

138. Which wild animal is typical of India's cold desert region ?

- (1) Lion
- (2) Snow leopard
- (3) Tiger
- (4) Bear

139. Oriental realm for distribution of wildlife includes

- (1) Southern Arctic and Lower Africa
- (2) North America, Europe and Japan
- (3) Australia and New Zealand
- (4) India and Southern East Asia

140. Cold seeps are areas on the ocean floor where

- (1) Hydrogen sulfide, methane and other hydrocarbon-rich fluids occur
- (2) Magma erupts
- (3) Photosynthesis takes place
- (4) Water evaporates

141. Keystone species are important because they

- (1) Always live in aquatic ecosystems
- (2) Maintain the diversity and stability of ecosystems
- (3) Have no ecological role
- (4) Have no predators

142. Tuberculosis in wild animals is primarily caused by

- (1) *Mycobacterium bovis*
- (2) *Mycoplasma gallisepticum*
- (3) *Salmonella typhi*
- (4) *Bacillus anthracis*

143. Bagasse is the fibrous residue left after extracting juice from

- (1) Wheat
- (2) Sugarcane
- (3) Rice
- (4) Jute

144. Which animal-source food has the highest protein content ?

- (1) Egg
- (2) Milk
- (3) Meat
- (4) Fish

145. What is main purpose of forest evaluation ?

- (1) To clear forests for agriculture
- (2) To increase industrial development
- (3) To replace natural forests with plantations
- (4) To estimate the value and condition of forest resources

146. As per the A.P. Forest Act, 1967 (Amendment), a private persons possessing Red Sanders Wood above what quantity (in kgs) must inform their stocks to the concerned divisional Forest Officer within 180 days ?

- (1) 5 kgs (2) 10 kgs (3) 20 kgs (4) 25 kgs

147. Which Authority is primarily responsible for initiating the process of recognizing forest rights under the RoFR Act, 2006 ?

- (1) Gram Sabha
(2) District Collector
(3) State Government
(4) Ministry of Environment, Forest and Climate Change

148. The administrative head of Andra Pradesh Forest Department is

- (1) Principal Chief Conservator of Forests & HoFF
(2) Additional Principal Chief Conservator of Forests
(3) Chief Conservator of Forests
(4) Conservator of Forests

149. The study of regolith is important in forestry because

- (1) It indicates rainfall patterns
(2) It reduces water infiltration
(3) It prevents afforestation
(4) It determines soil fertility and root penetration

150. The primary functions of geotextiles in soil are

- (1) Separation, filtration, reinforcement, protection, drainage
(2) Decoration and aesthetics
(3) Fertilization and irrigation
(4) Weather forecasting

FG/M/OSF/507

146. As per the A.P. Forest Act, 1987, what quantity (in kg) must inform their stock to the concerned divisional Forest Officer within 180 days?

- (1) 5 kgs
- (2) 10 kgs
- (3) 20 kgs
- (4) 25 kgs

147. Which Authority is primarily responsible for initiating the process of recognizing forest rights under the RFR Act, 2006?

- (1) Gram Sabha
- (2) District Collector
- (3) State Government
- (4) Ministry of Environment, Forest and Climate Change

148. The administrative head of Andhra Pradesh Forest Department is

- (1) Principal Chief Conservator of Forests & HoB
- (2) Additional Principal Chief Conservator of Forests
- (3) Chief Conservator of Forests
- (4) Conservator of Forests

149. The study of regolith as a potential for forestry because

- (1) It indicates rainfall patterns
- (2) It reduces water infiltration
- (3) It prevents soil erosion
- (4) It determines soil fertility and root penetration

150. The primary functions of geotextiles in soil are

- (1) Separation, filtration, reinforcement, protection, drainage
- (2) Decoration and aesthetics
- (3) Fertilization and water flow
- (4) Weather forecasting
